

DECIDE

All you have to do is: Step 1

Make the decision to engage in a managed supply chain.

1. Provide us with an outline of your product categories and time-frames.
2. Introduce us to your preferred spinner and knitter or weaver.

INFORM

Next: Step 2

Advise your spinner* that you are working with *NewMerino* to provide a totally transparent supply chain.

That you will require *NewMerino* Transaction Certificates.

That *NewMerino* will be responsible for selecting and verifying the farmers from which the wool is to be sourced.

* or your first point of contact in your supply chain

RELAX

And now: Step 3

We're now on your team working with your processing partners to ensure your merino products will be:

Authentic

Ethically managed

Sustainably produced

Fully traceable

Using 100% Australian merino — and you can prove it

This is what we will do for you:

Develop a Lead Time Plan

Starting with the date finished goods are required to be in your stores, this plan calculates times and dates for each processing stage right back to the selection of suitable farms and required shipping date of greasy wool from Australia.

Provide a Supply Plan Confirmation Report

Confirms supply chain partners.

Confirms technical and non-technical attributes required.

Identifies a time line for greasy wool supply, tops and yarn production.

Select supply

Identify and communicate with suitably qualified farmers for compliance with standards and protocols.

Work with farmers to determine availability of technically suitable wool .

Facilitate Purchase and Export

Work with topmaker and their Australian exporter to facilitate purchasing and export of greasy wool in accordance with specifications.

Provide Transaction Certificates

Greasy Wool Transaction Certificate > Topmaking Transaction Certificate > Spinning Transaction Certificate

Certificate of Origin & Attributes

On completion we will provide a 'Certificate of Origin & Attributes'. This report consolidates all key information about the consignment in one document. All the critical components for traceability.

- * Contributing farmers and volumes
- * Greasy wool consignment details
- * Names of all processing partners
- * Production details of tops and yarn
